

We Go Down

Krewella

If we go down
We all go down together
If we go down, down, down
We all go down together I beckon you to the edge
Come on and follow
Come on and follow
Hang your soul by a thread
Fill where it's hollow
Fill where it's hollow
Take a dance with the dead
Put reality to bed
If your misery needs company
Call on me If we go down
We all go down together
If we go down, down, down
We all go down together
We are wrong until it's right
Falling all as one tonight
If we go down, down, down
We all go down together If we go down
If we go down
We all go down together We've got nothing left to lose
Come on and shout it
Come on and shout it
And when the world is doomed
Get up and run it
Get up and run it
To the stars and back again
When we fall we're hand in hand
We're together like a symphony
Of broken dreams If we go down
We all go down together
If we go down, down, down
We all go down together
We are wrong until it's right
Falling all as one tonight
If we go down, down, down
We all go down together We are giants
We are bigger than the monster

Every second we are
Taking back the power
On the run till we get a fucking answer
Try to hold us down
But we're only getting strongerIf we go down
We all go down togetherWe all go down together
