

# Fire

## Michelle Williams

Oh yeah

Oh yeah They say anything that is worth it you must take it slow

They know when you come around ain't no choice but to grow

Listen for what you say when I lay down my head

I don't know no other way, but to let you have your way And no it don't always feel good

But yet, it all works out for my good

You say I can take the burn blazing deep inside It's feels just like fire, fire caught up in my bones

Don't leave me alone, don't leave me alone

Oh my, my little light

I need to feel that heat come from your (fire)

Fire, fire caught up in my bones

Don't leave me alone, don't leave me alone

Just shine like stars in the night

We need to feel that heat come from your fire

Oh yeah Just like them boys Shadrach, Meshach, and Abednego (Abednego)

I know when I come out the flames won't be smelling like smoke, oh no

Yup, that's just what you said, it went straight to my head

Remembering every day, to let you have your way And no it don't always feel good

But yet, it all works out for my good

You say I can take the burn blazing deep inside It's feels just like fire, fire all up in my bones

Don't leave alone, don't leave me alone

Oh my, my little light

I need to feel that heat come from your (fire)

Fire, fire caught up in my bones

Don't leave me alone, don't leave me alone

Just shine like stars in the night

We need to feel that heat come from your fire When your work is done, I'll be here shining bright

The pressure upon me, like diamonds in the sky

Turn it up higher, I want to feel your fire

All over it fills me, Jesus you purify me It's feels just like fire, fire caught up in my bones

Don't leave me alone, don't leave me alone

Oh my, my little light

I need to feel that heat come from your (fire)

Fire, fire caught up in my bones

Don't leave me alone, don't leave me alone

Just shine like stars in the night

We need to feel that heat come from your fire It's feels just like fire, fire caught up in my bones

Don't leave me alone, don't leave me alone

Oh my, my little light

I need to feel that heat come from your (fire)  
Fire, fire caught up in my bones  
Don't leave me alone, don't leave me alone  
Just shine like stars in the night  
We need to feel that heat come from your fire Oh, fire  
Oh, fire (We need to feel that heat from your fire)  
Oh, fire  
Oh, fire (We need to feel that heat from your fire)  
Oh, fire  
Oh, fire (We need to feel that heat from your fire)
