

Like Lions

The Queen Killing Kings

Something's bound to happen
I can hear it in the whispers of the night
Warn the others madness finds us drifting in the calm of tidal eyes I'm so scared we've been found
Ocean rose in violence
We were captive to a storm that wouldn't die
The weakest stood in silence
I was using all I've left to stay alive I'm so scared
(down to one last breath, I will take it to the deepest depths)
We will drown
(down to one last try, I will stretch the every inch of might) Run and tell the captain
That there's water in the bottom of this ship
We're sinking rather fast and I am certain that nobody's gonna live I won't return though I told you I would
Just know that I tried; I did all that I could
I wanted you to know, I wanted you to know Like lions we fought in the face of the storm
Like giants we stood when our ship wouldn't float
I wanted you to know, I wanted you to know
