Lead Balloon

Rosi Golan

Just when I thought I hadn't seen a thing, you went and promised me we'd float
Promenade through all the little corners fo the world that no one knows
Climb Mount Everset, build oruselves a terrace, overlooking Isle of White
But suddenly the skies are dearkening, the clouds are rolling in
I'm realizign all the whileI've been strung along and carried by a lead balloon
Oh but how could I have ever left the ground
When the reason I've been struggling pulling my weight is you
You're my love, you're my lead balloonJust when I thought I'm figuring it out, I've sorted through the doubt you caused
I start dreaming of rooms without a ceiling, buildings towering applause
If only we could drift as though we were filled with helium, light as feathers
We would never come undone, cause darlin' we'd be tetheredI've been strung along and carried by a lead balloon
Oh but how could I have ever left the ground
When the reason I've been struggling pulling my weight is you
You're my love, you're my lead balloon
