

Music Show

Marmaduke Duke

Kill that romantic
A perfect end to a perfect criminal
Go on pretending
You think you know everything anyway

A drink for your troubles
A drug to numb the pain away
We love like devils
Your view is all so alien

Oh, let's go to the music show
Where the lovers all dance to the song we wrote
I swear it moved me, moved me
I swear it moved me, moved me

Let's go to the music show
Where the lovers all dance to the song we wrote
I swear it moved me, moved me
I swear it moved me, moved me

Kill that romantic
A perfect end to a perfect criminal
Go on pretending
You think you know everything anyway

A drink for your troubles
A drug to numb the pain away
We love like devils
Your view is all so alien

Oh, let's go to the music show
Where the lovers all dance to the song we wrote
I swear it moved me, moved me
I swear it moved me, moved me

Let's go to the music show
Where the lovers all dance to the song we wrote
I swear it moved me, moved me
I swear it moved me, moved me

I swear it moved me, moved me
I swear it moved me, moved me
I swear it moved me, moved me
I swear it moved me, moved me

Your ship is sinking
Faster than the sun will rise
Your ship is sinking
Faster than the sun will rise

Considering your secret, considering your secret life
Considering your secret, considering your secret life
Considering your secret, considering your secret life
Considering your secret, considering your secret life
Considering your secret, considering your secret life

Considering your secret, considering your secret life
(Oh, let's go to the music show
Where the lovers all dance to the song we wrote)

Considering your secret, considering your secret life
(I swear it moved me, moved me
I swear it moved me, moved me)

Considering your secret, considering your secret life
(I swear it moved me, moved me
I swear it moved me, moved me)

Considering your secret, considering your secret life
(I swear it moved me, moved me
I swear it moved me, moved me)

Considering your secret, considering your secret life
Considering your secret, considering your secret life
Considering your secret, considering your secret life
Considering your secret, considering your secret life
