The Process

My American Heart

You've got this process figured out (You've got this process figured out) You've lost the love for yourself now Just know that I'm telling you to watch your back And hold your breath 'cause denial never spoke So loud, so loudTake all my self worth away (Take all my self worth away) Just cold with no love in my veins (In my veins)So show me how to feel nothing Show me how to feel safe And I promise I will do the same Do the same You've got no self control, no meaning in your makeup You are the reason for the broken hearts you've made up You've got this process figured out You're not so picture perfect, you're not so picture perfect You're not so picture perfect now Take all my self worth away (Take all my self worth away) Just cold with no love in my veins (In my veins)So show me how to feel nothing Show me how to feel safe And I promise I will do the same Do the sameYou've got this, this process So figured outTake all my self worth away Just cold with no love in my veins (In my veins)So show me how to feel nothing Show me how to feel safe And I promise I will do the same Do the same
