

# Someone Anyone

## Candle Nine

Thought we were past this  
Thought we moved on  
But I guess I was wrong  
Do we not learn from mistakes?  
Do we not have what it takes?  
Are you the cure or disease?  
Do you still take as you please  
Are you the cure? Or are you the disease?  
Someone, someone tell me what we're fighting for  
Anyone, anyone, anyone can start a war  
No one can walk away, no one can walk away truly alive  
Someone, someone, someone tell me why we need this?  
Anyone, anyone, anyone can start a war  
No one can walk away, no one can walk away truly alive  
Forward we find, yesterday's gone  
And I hope that I'm wrong  
If we don't learn from their past  
We'll repeat their history oh at last  
Are you with us or without?  
Scene is set but fading out

Are with us, well are you with us?  
Someone, someone tell me what we're fighting for  
Anyone, anyone, anyone can start a war  
No one can walk away, no one can walk away truly alive  
Someone, someone, someone tell me why we need it?  
Anyone, anyone, anyone can start a war  
No one can walk away, no one can walk away truly alive  
Are you the cure or disease?  
Do you still take as you please  
Are you the cure? Or are you the disease?  
Someone, someone tell me what we're fighting for  
Anyone, anyone, anyone can start a war  
No one can walk away, no one can walk away truly alive, truly alive  
Someone, someone tell me what we're fighting for  
Anyone, anyone, anyone can start a war  
No one can walk away, no one can walk away truly alive  
Someone, someone, someone tell me why we need it?  
I don't see a reason, tell me why we need a reason
