

# Let's Plant a Tree

[Patty Shukla](#)

Let's plant a tree

Chorus

Let's plant a flower, let's plant a tree

Let's plant a fruit, for you and me.

---

Twice

Mom took me to the store to-day

To buy some seeds and dirt

And when we got home we dug a big hole

And got right to work

We buried the seeds inside the ground

And watered them with a hose.

I couldn't believe how easy it was to make something grow.

Chorus

I watered the ground every other day

And suddenly on the 11th of May

A bud sprouted high in the air

All I could do was stop and stare

Every day it was something new

It grew and it grew and it grew

Now after two months I can see

Fruits for me on my beautiful tree

Chorus

I know it takes more than one ,

To give us food and oxygen

But together we can live long

And planet earth will get strong- strong

Chorus

---
