

Halcyon Days (Where Were You Then)

Local H

Those halcyon days are here
They went away but they're back again
This glow never ends, I'm numbed out on bliss
That it comes on like a friend and it's great A fantastic waste of time
Life is long but it all moves so fast
You're first and you're last, afraid of the future
But I'm bored with the past and it's great Yeah, it's great, it's so great
Remember when you wanted it all to end My last will and testament
Was full of things that I didn't really mean
I wanna come clean
But these words are easier to write than to read or to say My mood swings are severe
But halcyon days are here anyway
I'm held in your sway, the drug of your love
Has me slipping away and it's great Yeah, it's great, it's so great
Remember when you wanted it all to end
