Clouds

David Nail

Well, the turn signal's clicking and the seconds are slipping away

Just a little bit more of this turnpike and so much to say

The airport traffic it slows us to a still

You turn the radio down and leave one hand on the wheelWell, I don't know how to tell ya what you wanna hear

You see guys like me, we just disappear

And you deserve someone who'll never leave

But girl the last few days are the best we'll ever beChorus:

Isn't every goodbye a chance to become

A bittersweet memory for someone

Don't you ever look back with regret

Share with me a moment for all time

In a corner of your mindIf you've never seen New England in the fall

Should you find yourself up there give me a call

But before I make my way into the crowd

Could I share one more kiss while we're still in the clouds? Repeat Chorus TwiceIn a corner of your mind
