Gonna Move

Susan Tedeschi

When I was a little girl I felt so alone
Quiet country house that I had to call home
Living with a couple of folks, rich millionaires
Sat on their money Lord it seemed they didn't careFinally we moved to our own place
Where I could walk around with a smile on my face
And I knew in order to make a stand
I had to pull up my roots and move on in this landI'm gonna move away from here
You can find me if you want to go there
I'm gonna move away from here
You can find me if you want to go thereCame to a school in the big city
Looked around at the lights and I thought they were pretty
They told me and teached me to live by their rules
So I wouldn't be nobody's foolI found out, not too long
Their rules wouldn't let me sing my song
I know in order to make a stand
I had to pull up my roots and move on in this landI'm gonna move away from here
You can find me if you want to go there
I'm gonna move away from here
You can find me if you want to go thereI'm gonna move away from here
You can find me if you want to go there
I'm gonna move away from here
You can find me if you want to go thereThen I joined the college ranks
There they said they'd teach me how to think
Gave me books to read and papers to write
They didn't know that this girl's come to fightBut I found out after a while
Reading those books was making me lose my smile
And I knew in order to not conceal
I had to play music and express what I feelI'm gonna move away from here
You can find me if you want to go there
I'm gonna move away from here
You can find me if you want to go thereI'm gonna move away from here
You can find me if you want to go there
I'm gonna move away from here
You can find me if you want to go there
