

All I Want Is You

Julie Roberts

What I need is medication
In the form of a vacation
What I need is skies of blue
What I need is a perspective
One that's healthy but objective
What I need is a point of view
What I want is you
Everyone says, move on
That is what you would want
Good advise, they are right
That's what I need to do
But what I want, all I want is you
What I need is bread and water
And a father for our daughter
What I need is someone new
What I want is you
Everyone says, move on
That is what you would want
Good advise, they are right
That's what I need to do
But what I want, all I want is you
(Only you)
What I need is loss of memory
To forget when you were with me
What I need is to admit we're through
What I want, what I need
Oh, what I want is you
(Only you)
What I want is you
(Only you)
All I want is you
