## All I Want Is You

## **Julie Roberts**

What I need is medication In the form of a vacation What I need is skies of blueWhat I need is a perspective One that's healthy but objective What I need is a point of view What I want is youEveryone says, move on That is what you would want Good advise, they are right That's what I need to do But what I want, all I want is youWhat I need is bread and water And a father for our daughter What I need is someone new What I want is youEveryone says, move on That is what you would want Good advise, they are right That's what I need to do But what I want, all I want is you (Only you) What I need is loss of memory To forget when you were with me What I need is to admit we're throughWhat I want, what I need Oh, what I want is you (Only you) What I want is you (Only you)All I want is you
