

# Legends

## Dinka

I watch the sun fall down to kill the day  
Another part of me just went up in flames  
'Cause I'm bored and dumb and dying to change  
It's the simple life driving me insane Then you explode in my head  
And now you're all over me  
I come alive with you  
You know you set me free, let's go Let's burn this town right to the ground  
And we'll go down like every legend before us  
We'll part the seas, make history  
While chasing dreams like every legend before us You and me, we hit the streets  
'Cause the thrill of living gives me energy  
I wanna steal a car and rob a bank  
I wanna find a cure that'll save the world 'Cause our lives are going up in flames  
As we watch like it's a movie  
I come alive with you  
You're like the drug inside of my head Let's burn this town right to the ground  
And we'll go down like every legend before us  
We'll part the seas, make history  
While chasing dreams like every legend before us I open up like a window for you  
So come on in and destroy me like you do  
You come on in after midnight for me  
And drag me out while the city falls asleep Martyrs and kings, heroes and thieves  
We're chasing dreams like every legend before us Let's burn this town right to the ground  
And we'll go down like every legend before us  
We'll part the seas, make history  
While chasing dreams like every legend before us Let's burn this town right to the ground  
And we'll go down like every legend before us  
Liars and kings, heroes and thieves  
We're chasing dreams like every legend before us
