He

Plankeye

Take me far away, live a place to stay
'Cause I've been wondering for far too long
From the shadows of your wings
Complacency has taken over, fly me far awayAnd I forgot just what he means to me
Did you forget just what you mean?
Except for the silenceHave you noticed that I'm still here?
Wait in vain, when will you come near?
Words influence my nakedness
And compromise blurs the lines of distinction, distinctionAnd I forgot just what he means to me
Did you forget just what you mean?
Except for the silence
