Who Loves Ya Baby?

Debbie Gibson

Busy life, not enough time
To look in the mirror life in the fast lane
Look around and take note who really loves you?
Don't get caught up in the clouds or you'll go insane
When it seems everyone is needing something
Remember who's always been there for you
Who loves you baby? Who really loves you baby?
Who's always been on your side morning and night?
Who loves you baby? Who really loves you baby?
Who's gonna see to it that you're treated right?
Just a smile is alright don't owe me anything
Come escape with me, you have got the world at your feet
That's not always easy all those people caring
Yet you're still alone
I understand what's behind the feelings
I think I know you better than anyone
Who loves you baby? Who really loves you baby?
Who's always been on your side morning and night?
Who loves you baby? Who really loves you baby?
Who's gonna see to it that you're treated right?
I believe in you, yes! You believe in me too
Don't ever get swept away by something not real
'Cause the way I feel oh I will always feel that way
Who loves you baby? Who really loves you baby?
Who's always been on your side morning and night?
Who loves you baby? Who really loves you baby?
Who's gonna see to it that you're treated right?
Oh yeah, oh yeah who really loves you baby?
Who loves you baby? Who really loves you baby?
Who's always been on your side morning and night?
Who loves you baby? Who really loves you baby?
Who's gonna see to it that you're treated right?
Oh, who loves you baby? Who really loves you baby? Oh yeah
I say, who, who, who Who loves you baby?
Who, who, who who loves you baby? Yeah!
Ooh yeah! Who's always been on your side morning and night?
Who loves you baby? Who really loves you baby?
Who's gonna see to it that you're treated right?
Oh, who loves you baby? Who has loved you baby?

I've always been on your side morning and night
Say, who loves you baby? Who really loves you, loves you baby?
Who loves you baby? Who really loves you baby?
Who loves you baby? Who loves you baby?
