

# Not All Bad

## Terminal

I barely know you from a stranger  
But I here now ask the friend to talk

Nothing's quite as hard

As you've been on yourself just stay here  
Couldn't we all use the company when days don't last  
Couldn't we stand to hear someone say we're not all bad  
Let's catch a movie, something to make us love  
again  
Let's stay out all night go everywhere we took

Live while we're alive and take the world for more for more

When the sun is coming up and we're still hanging out

It's never been so nice to have someone around who believes in love  
Let's not make it home tonight because  
days don't last
