

All Moving Parts (Stand Still)

Black Sabbath

Super animation, turning on a nation
And they're saying all moving parts stand still
Since he was elected, adrenalin injected
Hear him saying all moving parts should kill
Just like the hero he's got them all on the run
Yes he's won, yeahSince he passed the motion
They're building in the ocean
And he's saying all men should all be free
What a combination, peace and radiation
And he's saying free men should fight for me
Just like his momma, he seems to get his pleasure from pain
And the rain, ain't that strange? Very strange, yeahI like choking toys
You've got to see me before you meet the boys
Teacher's burnt the school
He's had enough of sticking to the rules, alrightPeople stop and see
He's got to be more decadent than me
Just to pass the time
He gets his kicks from licking off the wine
