

You & Me

Beau Badrick

After all it's only just
you and me it's only us
I know that we can make this work

'cause I bet by now your heart's grown cold
the water's warm, but the summer's old
I know that we can make this work

because after all, it's only me and you,
and you and me oh baby
after all, isn't that how this is all supposed to be

because you see me for who I am
and you see me for who I am

Well after all, can't you see
It's only you, and it's only me
We've seen it all, we're meant to be

and I bet by now you'll second guess
live right now, forget the rest
I know we can take that chance

because after all, it's only me and you,
and you and me oh baby
after all, isn't that how this is all supposed to be

because you see me for who I am
and oh you see me for who I am

and forever is not that far away
so I don't ever want to hear you say
that it's all over

And though the winter weather comes around
I know it won't rip our roots up from the ground
don't say this is over

because forever is not that far away
and it grows like springtime more each day

So don't say this is over, just yet

because after all, it's only me and you,
and you and me oh baby
after all, isn't that how this is all supposed to be

because you see me for who I am
oh baby, you see me for who I am
and you see me for who I am
and you see me for who I am
who I am
who I am
