

# It's My Turn Now

Keke Palmer

What! Huh!

Huh huh huh, my turn!

Oh oh oh

Huh! C'mon!

Oh oh oh This time for real, tired of playing it safe

Inside I feel I've got what it takes

To prove, show the world who I really can be

I know for sure there's no stopping me No time to wait on the side, watching it all pass me by

I'm gonna be in the game, watch me playing

I'm coming with it ya know, let's get to starting the show

Turn up the lights, hit the stage, no more waiting Its my turn now and ya know that I'm ready

Its my turn now, yeah, I'm strong and Im steady

Break down the walls gonna go for it all

Its my time, gonna shine, show you how

Because its my turn now Oh oh oh

What!

Oh oh oh I'm in my groove now I'm having some fun

I know what to do and how to get it done

Do my thing double time and there's no holding back

Make it good, make it right, hear the crowd react No time to wait on the side, watching it all pass me by

I'm gonna be in the game, watch me playing

I'm coming with it ya know, let's get to starting the show

Turn up the lights, hit the stage, no more waiting Its my turn now and ya know that I'm ready

Its my turn now, yeah, I'm strong and Im steady

Break down the walls gonna go for it all

Its my time, gonna shine, show you how

Because its my turn now Its my turn now in my heart Im believing

If can see how I can live what Im dreaming

I understand, now I know who I am

It's my chance, gonna dance, play it loud

Because its my turn now What!

My turn now

Oh oh oh

My turn! One, two, now we'll do

Just what Ive always wanted too

Three, four, do some more

Everything you ever wanted and were waiting for Its my turn now and ya know that Im ready

Its my turn now, yeah, Im strong and Im steady

Break down the walls gonna go for it all

Its my time, gonna shine, show you how  
Because its my turn nowIts my turn now in my heart Im believing  
If I can see how I can live what Im dreaming  
I understand, now I know who I am  
It's my chance, gonna dance, play it loud  
Because its my turn now
