

# Space

M.i.a.

Gravity's my enemy  
It grabs on me like I'm on E  
The stars are banging close to me  
As I'm floating in the life Odyssey My lines are down, you can't call me  
As I float around in space Odyssey  
My lines are down, you can't call me  
As I float around in space Odyssey Like puzzle bubble on PC  
It's got color waves following me  
And I still judge it week by week  
And I'm ahead of time, so you never lose me My lines are down, you can't call me  
As I float around in space Odyssey  
My lines are down, you can't call me  
As I float around in space Odyssey Can I take a minute or two  
To introduce my point of view  
I need to spend some time with you  
There's nothing more new on the news My lines are down, you can't call me  
As I float around in space Odyssey  
My lines are down, you can't call me  
As I float around in space Odyssey
