

Give Em Hell

Primal Fear

Gimme more
Right down on the floor
Time stood still
In the darkness No time to take
No chance to hesitate
Do or die
It's all about your lies Back from hell far off the horizon
Light it up and burn it down Give em hell - I'll make the call
Hell and thunder roars You're on your knees - beaten and broken
Break these walls
When world powers fall Clashing steel - and the flag of war
The march of the death
Where it all ends Back from hell far off the horizon
Light it up and burn it down Give em hell - I'll make the call
Hell and thunder roars
Give em hell - part of the masterplan
Hell and thunder roars
