

Dark Doo Wop (Birthday Boy Version)

MS MR

This world is gonna burn, burn burn burn
As long as we're going down,
Baby you should stick around
Baby you should stick around It's all gonna shift, it's out of our hands
Babe if you could know, you would hatch a plan
That's my, that's my man If we're gonna die, bury us alive
If they're searching for us they'll find us side by side
That's my, that's my man This world is gonna burn, burn burn burn
As long as we're going down,
Baby you should stick around
Baby you should stick around The earth breaks, it falls and save your beat
I'd find myself swallowed, drowning in your heat
As long as we're going down,
Baby you should stick around
Baby you should stick around This world is gonna burn, burn burn burn
As long as we're going down,
Baby you should stick around
Baby you should stick around This world is gonna burn, burn burn burn
As long as we're going down,
Baby you should stick around
Baby you should stick around
