

She Knows Her Way Around

Act of Congress

My baby knows me
The good, bad, and gross things I never like to tell
And those places deep inside
Those shameful retreats of mind
That she can always seem to find Oh she knows all the roads I am prone to wander
She knows all the rocks I've been crawling under
She knows all the places I can be found
She knows her way around My baby loves me
Despite the ugly words I throw her way
And she still wins every fight
No matter if she's right
She sees right through me every time Oh she knows all the roads I am prone to wander
She knows all the rocks I've been crawling under
She knows all the places I can be found
She knows her way around I wouldn't have it another way
She calms my fears and keeps me safe
When someone gets you it gets you sane
It's good to know that I am known She knows all the roads I am prone to wander
She knows all the rocks I've been crawling under
She knows all the places I can be found
She knows her way around She knows all the roads I am prone to wander
She knows all the rocks I've been crawling under
She knows all the places I can be found
She knows her way around Yeah, she knows her way around
