## Siberian Divide

## **Mastodon**

Ice god shakes the earth Destruction of the path Sinking deeper in the snow Eating bark with blackened hands Swollen fingers frozen jaw Warm teeth wrapped around my wrist Frostbite eating away at our limbs Slit the belly brontotherium Climb towards vermillion snowbank fall Station of the crosses prayer save all Chewing bone Euphoria Land and sky Shining skull Ice field blanket land Hunted beyond the fray No direction known Running with the band Provisions wearing thin Avalanche sweeps the land Starvation setting in Spilling all that's left Should've kept the fruits from virgin's vine Three-horned face Pillar of red Evil lives atop my crooked spine Rosebush current flow Carmine river go Solar storms erupt on the sun Ice fields blanket land Snow queen Hypothermia Ice lips Hallucination Ice field blanket land Hunted beyond the fray No direction known Running with the band

Provisions wearing thin

Avalanche sweeps the land
Landscape ebb 'n' flow
Think I felt the end of time
Skulls aglow as crystal shines
And starts to warm the empty climb
