

# Always

JC Chasez

When you need someone  
When it's all gone wrong  
You'll see that  
I will be there for you always  
When the lights go out  
And the world breaks  
And your heart aches  
I will be there for you always... all of the days  
Always Turn around  
You feel like it's all gonna change  
It's written on your face  
But girl don't be afraid Let's talk about us  
And the promises we made  
How they still mean the same  
The questions in your heart can't be erased You say I won't come home  
And that I'm leaving you alone  
I know  
But you'll always be with me wherever I go Close you eyes  
Hear what my voice says  
It all comes down to making choices When you need someone  
When it's all gone wrong  
You'll see that  
I will be there for you always  
When the lights go out  
And the world breaks  
And your heart aches  
I will be there for you always... all of the days  
Always Can you hear me now?  
Do you know how much you mean to me?  
I'm just a heartbeat away  
So girl don't be afraid See time goes by so slowly  
Every second of the day  
I'm so lonely  
In my heart you're the one and only  
And I can't wait for you to hold me Close you eyes  
Hear what my voice says  
It all comes down to making choices When you need someone  
When it's all gone wrong  
You'll see that

I will be there for you always  
When the lights go out  
And the world breaks  
And your heart aches  
I will be there for you always... all of the days  
Always Every night  
Every night I walk outside  
I feel you everywhere  
I see you in the sky When you need someone  
When it's all gone wrong  
You'll see that  
I will be there for you always  
When the lights go out  
And the world breaks  
And your heart aches  
I will be there for you always When you need someone  
When it's all gone wrong  
You'll see that  
I will be there for you always  
When the lights go out  
And the world breaks  
And your heart aches  
I will be there for you always... all of the days  
Always
