

Even Though

Case

I remember summer girl
We fell apart
We were so close girl
I never thought of another in my life
But you moved on
Hope you're doing fine
They say you're in love
But I know you still think of me Even though he may kiss your body real nice
I know you think of me girl every time
Even though he makes love to you every night
I know you think of me girl every time Now I hear he treats you real good
And makes you so happy but
But that cannot compare to
All the time and love that we've invested
It's okay, I've moved on
So take care of yourself but
Just remember these words
I know you still think of me Even though he may kiss your body real nice
I know you think of me girl every time
Even though he makes love to you every night
I know you think of me girl every time Even though he may kiss your body real nice
I know you think of me girl every time
Even though he makes love to you every night
I know you think of me girl every time When he runs fingers through your hair
I know you think of me, every time
When he gives you bubble baths
I know you think of me, every time
When he dives for your treasure
I know you reminisce, every time
About the love we shared
You can't compare to nothing baby I know you do
I know you want me baby
I know you think about me
I know you want it baby Even though he may kiss your body real nice
I know you think of me girl every time
Even though he makes love to you every night
I know you think of me girl every time Even though he may kiss your body real nice
I know you think of me girl every time
Even though he makes love to you every night

I know you think of me girl every timeEvery time
Every time
