

Forget the Cost

Ub40

Multi-million dollar, explorations into space
While in the name of progress, this planet's laid to waste
Nation takes on nation and is stepping up the pace
And someone's got his finger out Forget the cost, we've got to choose
As we're running in a race, we can only lose Rich is rich and poor is poor and never the twain shall meet
East is east and west is west and only one shall eat
The microchip has come of age and man is obsolete
Someone's got his finger on Forget the cost, we've got to choose
As we're running in a race, we can only lose Multi-million dollar, explorations into space
While in the name of progress, this planet's laid to waste
Nation takes on nation and is stepping up the pace
Someone's got his finger out Forget the cost, we've got to choose
As we're running in a race, we can only lose Rich is rich and poor is poor and never the twain shall meet
East is east and west is west and only one shall eat
The microchip has come of age and man is obsolete
Someone's got his finger
out Forget the cost, we've got to choose
As we're running in a race, we can only lose
Forget the cost, we've got to choose
As we're running in a race, we can only lose Forget the cost, we've got to choose
As we're running in a race, we can only lose
Forget the cost, we've got to choose
As we're running in a race, we can only lose Forget the cost, we've got to choose
As we're running in a race, we can only lose
Forget the cost, we've got to choose
As we're running in a race, we can only lose Forget the cost, we've got to choose
As we're running in a race, we can only lose
