

What's Another Day of Rock & Roll

Triumph

We've been five years workin' in a rock & roll band
Blasting heavy metal right across the land
I know if we're good and we see the light
We could tour the U.S.A., I think we might Playin' really loud to overflowin' crowds every night
Party with people and rock until the morning light It's taken so long to make it this far
What's another day of rock & roll
It's taken so long to make it this far
What's another day of rock & roll Well, my friends try to tell me that we're wastin' our time
But I'll put our rockin' music on the line
We're going to make it big just you wait and see
I ain't lettin' people get the better of me We'll make them have the records
We're going to make the people get higher
And I know every moment we got to set the world on fire It's taken so long to make it this far
What's another day of rock & roll
It's taken so long to make it this far
What's another day of rock & roll Now people got to line up wherever we go
Trying to get a ticket to our headline show
We're packing screaming crowds in right to the door
Fifteen thousand people, watch them yell for more Now everybody calls us trying to get a minute of our time
Well, I think it's safe to say nowadays we're doing fine It's taken so long to make it this far
What's another day of rock & roll
It's taken so long to make it this far
What's another day of rock & roll Rock & roll
Rock & roll
Rock & roll
