Our World

Buck

Lately I've been thinking
About how we live our lives
There are too many conflicts
'Cause no one sees eye to eye
And now the world is changing
We got pollutants in the sky
Starving children
And murders in the name of Christ
This is our world, to make it last
We have to not repeat the past
Just step outside, when will we learn
The destruction of our world, our world
If all we have is one life
And you're never coming back again
Would you look at what we've done
Is a beginning or an end?
When I feel the sunlight
I wonder how much my world can take
We must do something now
With so many lives at stake, yeah
This is our world, to make it last
We have to not repeat the past
Just step outside, when will we learn
The destruction of our world
This is our world, we must give back
Instead of killing what we have
To love inside and spread the word
If you want to save our world, our world, yeah
I'm standing up, I've had enough
I'm sick and tired of just waiting
Our world corrupt, so out of touch
Our world, how do I save her?
How do I save her?
How do I save her?
How do I save her?
This is our world, to make it last
We have to not repeat the past
Just step outside, when will we learn
The destruction of our world

This is our world, we must give back
Instead of killing what we have
To love inside and spread the word
If you want to save our world
