Wonderland

Blutengel

ou wake up crying in the night
And you feel this pain insideYou feel so lonely feel so weak
And you have no words to speakThere's no one to hold you tide
Another nightmare in this nightYou just want someone beside you
But there's nothing you can doI will take you by the hand and I show you wonderland
Is this the place where you can hide from the world that makes you cryThere's no darkness there's no light you can see without your eyes
You only feel a warm embrace that will last forever...You open the window and cry in the night
To the stars so far awayAnd you hope and pray tonight
For a wonderYou listen to your broken heart
And you understand the wordsThis is the night of changes
So you spread your wings to fly
