

# Mechanism

## Benza

Won't look beyond their own existence  
Don't understand difficult circumstances  
Only know what little they've experienced

No, I won't waste my breath because they lack sense  
Plague of the Earth, a propaganda fantasy  
That never gels in the test of reality  
Infiltrated every aspect  
Infiltrated every aspect, mechanisms

Infiltrated every aspect, inject brainwash  
Look back through the past, see the mass grave  
Filled with corpses of the helpless slain  
Once established always ends the same  
Expansion is the next stage of their game

Invasion forces capture a country, occupy the territory  
Infiltrated every aspect  
Infiltrated every aspect, mechanisms

Infiltrated every aspect, inject brainwash  
GoTheories in practice, demons run wild  
Skulls on skulls are stacked and piled  
Master creator, human nature denied  
Kills the incentives for the best to strive  
Infiltrated every aspect  
Infiltrated every aspect

Infiltrated every aspect, inject brainwash  
Only know what little they've experienced  
No, I won't waste my breath because they lack sense  
Plague of the Earth, a propaganda fantasy  
That never gels in the test
