

Hey

Sammy Johnson

Verse 1

There's this girl I like to meet
I hear people on the streets, they talk about her all the time
Say that she is oh so fine
Think I seen her once before, but I can't say this for sure
Cause it was long ago
So a night out with the boys
I hear people making noise from the corner
Where my eyes can't in my surprise
Where's the girl that I've been dreamin of
I just can't believe my luck tonight.

Chorus (X2)

I said Hey (I said Hey)
What's your name (What's your name)
Did you come alone
Well I like to get to know you
And baby I can show you a good time

Verse 2

Now my friends are looking at me thinking,
What is this guy up to
Saying, I don't even stand a chance
Shes way out of your league man
I don't really care at all cause she'll be coming back for more after the night.
As I make my way over to her
I fee-ee-eel my stomach start to cave in
And I aint even there yet
But somehow I find the words to say
And now shes smiling back at me
And I have to say

CHORUS (X3)
