The Machine Stops

A Hope for Home

I found the air, down here in the chambers
You warned me of danger
But I want to stop this for a moment
There must be someone in the openWaiting for the starlight
Rendezvous at midnight
I want to touch them and to love them
And we'll be there when it's overAll the love we'll never know
The machine has got controlCan you hear the voices
Calling out the choices
Spend a lifetime going nowhere
The machine stops and it's overAll the love we'll never know
The machine has got control
I found the air
The machine stops
