

# The Machine Stops

## A Hope for Home

I found the air, down here in the chambers  
You warned me of danger  
But I want to stop this for a moment  
There must be someone in the openWaiting for the starlight  
Rendezvous at midnight  
I want to touch them and to love them  
And we'll be there when it's overAll the love we'll never know  
The machine has got controlCan you hear the voices  
Calling out the choices  
Spend a lifetime going nowhere  
The machine stops and it's overAll the love we'll never know  
The machine has got control  
I found the air  
The machine stops
