You Did It

Lit

You got scared, so you played it rough
You didn't think I call you bluff
You're playing the game,
But I lead it up
You made the bed, now you're lying in it
With someone else, while I pay the rent
Well, I can fix this mess you made
But I'll not help you pack all these
I know that you did it,
It's so hard to admit it
That's why I start go down
And now you're just playing
And I'm just saying that
You did it, you did it, you did it, you did it
You did it and now it's done
You got lucky when you met me
But you doubled down against me
The guy that you knew and eat up your glue
Fatal attraction, getting some action
Now all I got is an allergic reaction
I can change what you did wrong
But now you finally get your song

I know that you did it,
It's so hard to admit it
That's why I start go down
And now you're just playing
And I'm just saying that
You did it, you did it, you did it, you did it
You did it and now it's done
I know that you don't believe it
But I try so hard, so hard
You made the bed, now you're lying in it
You're lying, you're lying, you're lying, you're lying
I know that you did it,
It's so hard to admit it
That's why I start go down
And now you're just playing
And I'm just saying that

You did it, you did it, I know that you did it
Ohh yeah, you did it, you did it, why won't you admit it?
You did it and now it's done
You did it and now it's done
