Circle

Softengine

The only way a human learns
an ending waits to make wrong turns
Against all odds
No expectations
No uploads
While on the merge of breaking down
we still won't bow in front of kings
No matter what the future brings,
still facing same mistakes.Circle flows
My head
Hold on till the end
if you grand me oneCircle flows
Your life and I
We can break, we can ruin
we can burn it if we want
Or get over it nowI can take you down to the last generation
show you how all this frustration
took its toll from end to beginning
I bet you know there is no living on the edge
This ain't no time for us to say
Shout out our names and fly away
Today we'll break rutineCircle flows
My head
Hold on till the end
if you grand me oneCircle flows
Your life and I
We can break, we can ruin
we can burn it if you want
Or get over it now
Or get over it now!We still won't bow
In front of kings
Cause I don't care what the future bringsCircle flows
My head
Hold on till the end
if you grand me oneCircle flows
Your life and I
We can break, we can ruin
we can burn it if you want
Or get over it now
