

Pilots of a New Sky

Sinew

empty and still rests the night that gave birth to me
Spirit to form, many from one, beloved one
explode into Being
matter glooming in radiant starlight
conscious and free
but unaware of myself

align with me
we're creating tomorrow
endlessly we're striving for love
enter the string that has blessed you with purpose
pilot the wings determine the limit of sky

Let that Big Bang ignite in your mind

you are a hope for the wholeness of galaxies
spirit as two, returning to one, beloved one
come into play
you're the next step of creation's unfolding
dawn of a day
vast, wondrous and new

align with me
we're creating tomorrow
endlessly we're striving for love
enter the string that has blessed you with purpose
pilot the wings determine the limit of sky

Let that Big Bang ignite in your mind

in my chest
a hole that hurts until you fill it
I won't rest
until the last one of you wakes up to me

align with me
we're creating tomorrow
endlessly we're striving for love
enter the string that has blessed you with purpose

pilot the wings determine the limit of sky

let that Big Bang ignite in your mind

take the leap

there's no time

let that Big Bang ignite
