Virtual Future

Sinergy

Exploring dangerous new frontiers
in the new age of artistry
State of the art intelligence
disclose a new discoverySecrets reveal schemes to dominate humanity
Carefully devising new genetic destiniesLook to the future through virtuality
escape into the illusions
Alter the outcome, create the aftermath
advance to a new... here after!Conspiracy of the corporate spys to overtake
Access granted to trespassers, the sealers of fateTime is a river winding steadily
down the path of tomorrow
You could drown if you're not prepared
for what's to come
Look to the future through virtuality
escape into the illusions
Alter the outcome, create the aftermathOnward ahead, racing the day
transporting light years down the line
Deflecting adversary's reign
reformulating rival crimesTime is a river winding steadily
down the path of tomorrow
You could drown if you're not prepared
for what's to comeLook to the future through virtuality
escape into the illusions
Alter the outcome, create the aftermath
