

# Who's Watching You

## Vain

She had something to hide in her eyes  
Full of mystery that girl  
Everyone knew what she could do to me  
I'm following you on your tracks  
Maybe take you for a ride  
I'll cool cool off your engines  
This time you'll feel some fire And you'll know my secrets  
When you're pumping on my ground  
(chorus)  
Who's watching you who's watching you  
Well you better believe girl  
If nobody is then I'm gonna be watching you(repeat) Less than a woman more than a girl  
Some kind of a nature child  
Oh everyone knew that she was running wild  
I'm following you on you on your tracks  
Maybe take you for a ride  
I'll cool cool off your engines  
I wanna put out fire  
And you'll know my secrets  
When you're pumping on my ground(chorus) Shake shake...  
(chorus out...)
