Future Brain

Den Harrow

Stockin' away. all the details you want to know.
Day after day. all your memories get to grow.
Putting all that you've stolen
In a prison that you've locked forever.
Taking the place. of our imagination
But you won't erase my heart.There is no way. you can understand what I feel.
You never pray .'cause your soul isn't even real.
You might know lots of things now.
But you can never be a lover.
Winning the race. with your information
But you can't replace my soul.REFRAIN:
Future brain .you make me wonder.
Is it sane to make a sample of my love.
Future brain you're getting stronger.
It's a shame you'll never know how to find love.Living today. but tomorrow will be the same.
I know I can say. that you will never win this game.
No matter how much you know now.
You will never get to know us never.
Taking the place. of an institution.
But you can't replace my loveFuture brain you make me wonder.
Is it sane to make a sample of my love.
Future brain. you're getting stronger
It's a shame you'll never know how to find loveFuture brain .you great computer
It's insane to program everybody's love
Future brain. your list is longer
But you're to blame 'cause you don't know
How stupid you are.
