The Fort

Between The Trees

If we had one opportunity
One chance just a chance to go and find ourselves
(Like when we were young, when we were)
Best friends running through the woods
And we were acting like we're lost just
To get away for the weekend
(Just to get away)
From the city
We could spend tonight looking back
Or we could try to find all this time spent
On barely knowing who we are
A child like us, is all we need
So here's our chance
Our chance to make the change to become
The type of people that we've always wanted to be
(We're not living by what anybody says
Only living by what we've known since we)
We were, we were best friends
And we knew how to get away for the weekend
We could spend tonight looking back
Or we could try to find all this time spent
On barely knowing who we are
A chance like this is all we need
I found myself in the forest
(In the forest)
I found love in the forest
We just need time to try
And find ourselves again
Or just time to breathe
We think we need so many useless things
When all we really need is time to breathe
When all we really need is time to breathe
