

# The Lines We Cross

## The Black Maria

Something comes over me  
There's poison coming from the TV  
The buzzing attracts the fleas  
I've seen the sun rise for weeks We're lost in each other  
What's one without the other?  
Fused together, fused together Paranoid by the sound of the streets  
Wood creaks like the march of machines  
My blood lust consuming me  
My hunger is matched by my greed We're lost in each other  
What's one without the other?  
Fused together, fused together We're lost in each other  
What's one without the other?  
Fused together, fused together Now save us from the killer's eye  
Save us from the lines we cross
