

# Endangered Species

## Steel Pulse

A slack we slack, it's keeping us back  
A slack we slack, no time fe dat, oh wee  
Destruction of the black civilization  
Let me tell you this Cause every time I raise my weary hand  
I see desolation and I feel despair  
Watching my nation going down the drain  
Going around as if they just don't care Still in the streets looking for justice  
Losing our life a very heavy price to pay  
Lift up your voice and shout for equal rights  
They're killing us out, oh yes from day to day Don't touch the coke nor the crack  
That de kind a drug just a keep you back  
Watch de gang and de gun  
That dey kind a life just a keep we down  
Go to school and learn the rule  
Let me tell you something, education rule  
Got to earn self respect  
A good things a come through blood and sweat Cannot all born fi live a prison  
To live by the gun is only suicide  
So when wise men speak you better listen  
Never too late to take some sound advice  
The nation's strength is in the family now  
A house that's divided, no can never stand  
Brothers take up responsibility  
Lead all your children with your precious hand Destruction of the black civilization  
Endangered species don't you know  
Destruction of the black civilization  
Sho way wa ba da yeah Don't touch the coke not the crack  
That de kind a drug just a keep you back  
Watch de gang and de gun  
That kind a life just a keep you down  
Go to school and learn the rule  
Let me tell you something education rule  
Got to earn self respect  
A good things a come through blood and sweat Destruction of the black civilization
