

Dreaming Under The Same Moon

[Julianne Hough](#)

Take a chance, a leap of faith, leave the nest
I guess that's how we've learned to fly
We spread our wings and rode the wind
You've chased your rainbows, I've chased mine
It's not always easy being this far apart
But don't you get the feeling we're connected at the heart
And we're dreaming under the same moon, under the
same stars
I close my eyes wishin' I'm gonna see you soon
When I see that night sky glowin' there's a peace I get from knowin'
That we're dreaming under the same moon, under the same stars tonight
Here I am and there you are I admit
there are times I wish I was home
Then I hear your voice on the line makes me realize I'm never alone
We've been working so hard tryin' to make it all come true
What I want for me, well that's what I want for you
And we're dreaming under the same moon, under the same
stars
I close my eyes wishin' I'm gonna see you soon
When I see that night sky glowin' there's a peace I get from knowin'
That we're dreaming under the same moon, under the same stars
I close my eyes wishin' I'm gonna see you
soon, I'm gonna see you soon
When I see that night sky glowin' there's a peace I get from knowin'
That we're dreaming under the same stars
Oh baby, we're dreaming under the same moon tonight, tonight
Take a chance, a leap of faith, leave the nest
I guess that's how
Yeah, we're dreaming under the same moon
Here I am and there you are
I admit there are times
Yeah, we're dreaming under the same moon
