

Positive Hardcore

Good Clean Fun

Danny's on the drumset, Justin' on the bass
Kelly's got the rhythm, while Aaron shreds the place
Issa's writing songs again he's screaming them all night
For a positive solution, together they will fight
People of the world today, are we looking for a better way of life?
People of the world unite, let's make a difference we can get it right
We are a positive hardcore band
We are ready to take a stand
We know the future's in all our hands
We are a positive hardcore band
We went around the globe, we crossed the equator
We didn't come back home again until almost 3 years later
We made a lot of new friends, we had a lot of fun
You think this story's over but it's only just begin
