

Twisted Nerve

Kill Bill OST

You are a chainsaw through my heart
Ripping right through me from the start
You make me go crazy all night long

I need you so bad, I know it's gotta be wrong You get on my nerves, you make me so mad

It's times like these that I just can't stand

You're so far away and I can't hurt you now

I guess I'll just use myself like I know how Rip out my hair

Wish that it's yours

Cut my own skin

Pretend that it's yours

Call you up in tears Then you'll take back all the things that you said

And we can be ourselves once again Goddamn, how you make me scream and shout

I don't wanna run around my room and pout

But you make me do it and I can't hardly stand it

You've got my heart and you know you've always had it But now you're so far away

And there's no way to make you pay

So I'll go around my room and break anything I want

And in my head imagine breaking your heart Rip out my hair

Wish that it's yours

Cut my own skin

Pretend that it's yours

Call you up in tears You're such a tease, you're such a jerk

Why do I waste my time?

I'll make you take back all the things that you said

I'll make you take back all the things that you said You're such a tease, you're such a jerk

Why do I waste my time?

I'll make you take back all the things that you said

I'll make you take back all the things that you said You're such a tease, you're such a jerk

Why do I waste my time?

I'll make you take back all the things that you said

I'll make you take back all the things that you said You're such a tease, you're such a jerk

Why do I waste my time?

I'll make you take back all the things that you said

I'll make you take back all the things that you said

And we can be ourselves once again You are a chainsaw through my heart

Ripping right through me from the start

You make me go crazy all night long

I need you so bad, I know it's gotta be wrong You get on my nerves, you make me so mad

It's times like these that I just can't stand

You're so far away and I can't hurt you now
I guess I'll just use myself like I know how
