All The Love

Tindersticks

All the love
All the love inside me
Is on it's way
Is on it's way to find you
Don't try to hide
From my love for you

All the love
All the love inside me
Is on it's way
Is on it's way to find you
Like the tide
I'll always return to you

And all the love
All the love inside you
It's for me
In the dooms in the tall grass
You said and smiled
You're the only one
That could ever tease me

All the love
All the love inside you
Diffuse me still
Getting closer to you

Only sure
Sing your love
To the stars
They're the guiding
Me back to you

All the love
All the love inside me
Feels your breath
Upon my back hand

Here's your song
Would cause me home

If I could tell you
Of all the things I've seen

All the love
All the love inside them
At lack to wait
For its own protection
For so long
Became just a memory

And all the love
All the love inside them
Twisted into hate
They have no choice to
Pass on the fear
Pass on the pain

Pouring down into the child
Into the man
Into the world
Glued to love
The gun that's in his hand

All the love
All the love inside me
Fell like the drought
In a petty ocean

Had to stop
Looked at my hands
And my fingertips
Trembling at the thought
Of touching you
