

Evermore

Vertical Horizon

Out in the haze of the distance
You're never sure, but you're listening
Static in then fading out
Like a sound in the city
Just a long lost memory
Echoing in the undergroundI know you you can't sleep
You just look for love evermore
I pray your soul to keep
And you just look for love evermoreYou felt the spark but you missed it
You can't live your life 'till you risk it
Still the trash in the barrel burns
It would go if you let it
All the pain could be ended
I'm right here, but you never ever learnI know you you can't sleep
You just look for love evermore
I pray your soul to keep
And you just look for love evermoreEvermoreHanging on evermore
Hanging on evermoreNever be enough
Never be enough
No I'll never ever be enough
Never be enough
No I'll never ever be enough
Never be enough
No I'll never ever be enough
Never be enough
No I'll never ever be enoughI know you you can't sleep
You just look for love evermore
I pray your soul to keep
And you just look for love evermoreEvermoreHanging on evermore
I'll be hanging on evermore
