

Wave (Brazzabelle Remix)

Crystal Fighters

We're here our way, hear the same groove
Get on the wave, universal sons,
One thousand suns with the power of one
Thousand universes, from the mind of one
In the galaxy of truth, your stars are the eyes
your heart is the sun, in the depths of my mind
the space is our thoughts, there's gravity inside,
We're in the universe of our mind
We're riding on a wave babe, we're on the same wave
We're on our way baby
We're flying all the way babe, we're on the same wave
We're on our way baby.
We're on the same wave
Now the world's in motion
How my body feels
moving through oceans
or the earth beneath
Oh universal feelings
oh stars explode
and keep us floating
for the path to go
In the galaxy of truth, your stars are the eyes
Your heart is the sun, in the depths of my mind
The space is our thoughts, there's gravity inside,
We're in the universe of our mind
We're riding on a wave babe, we're on the same wave
We're on our way baby
We're flying all the way babe, we're on the same wave
We're on our way baby.
A universal body, the garden of light,
Awakening spirits, living deep inside,
The walkway to your heart, skipping stones in the sunrise,
Time flies by at the speed of light.
We're riding on a wave babe, we're on the same wave
We're on our way baby.
We're flying all the way babe, we're on the same wave
We're on our way baby.
